All prices INCLUDE delivery
on mainland UK

Ideal for

- Road works
- Contraflows

Also used in light traffic areas,
such as car parks & airfields

APPLICATION INSTRUCTIONS

The tape can be applied manually or mechanically

1. Mark the position of the tape on the road surface with chalk
2. Sweep the road surface to remove loose debris or dirt
3. Ensure that the road surface is free from grease, oil or other contaminants
4. Apply a layer of UKT79 PRIMER with a brush (1 litre of primer is good for 5M²)
5. Allow the primer to dry slightly
6. Unroll the tape and press down firmly
7. Repeatedly press down on the tape with a brush to improve the initial contact (especially on the edges)
8. Drive slowly several times over the tape to ensure maximum adhesion.

NOTE : The edges of the tape are sharp—take care
